

GORDON PRODUCTS

Specialist manufacturers of wire and sheet metal fixings for the precast concrete & construction industries

Lifting Hooks

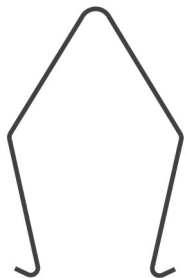

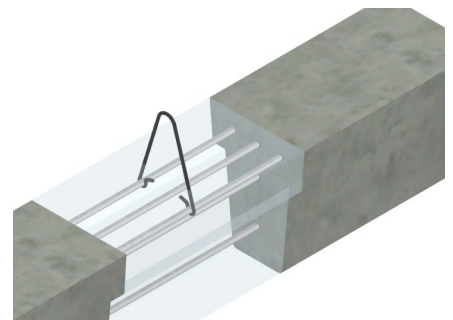

Lifting hooks are manufactured from high carbon spring wire and are cast – in during the manufacture of precast concrete T-beams so allowing them to be easily broken free from the moulds when cured

Clip-On Lifting Hooks

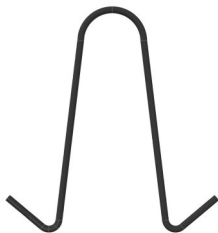

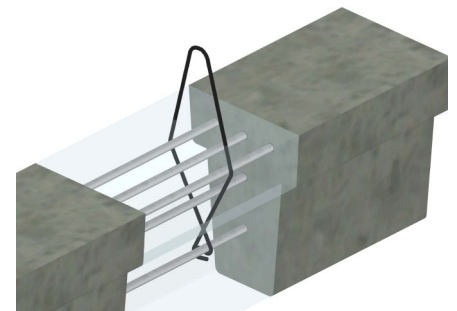

Clips securely to the pre-stressing wires

To suit 5 and 7mm diameter pre-stressing wires and 9.3mm strand

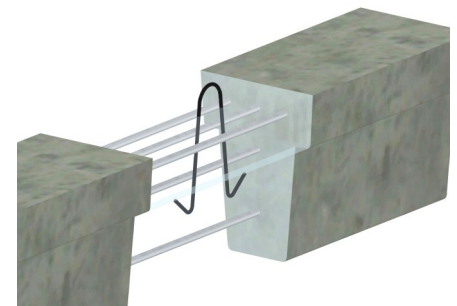

Cross-Over Lifting Hooks

Allows the lifting forces to be applied further down in the mould

Push-In Lifting Hooks

Easily inserted after the concrete has been poured

Established for over 40 years, Gordon Products manufactures and supplies quality products to a diverse range of manufacturing and construction industries.
