

GORDON PRODUCTS

Specialist manufacturers of wire forms and sheet metal fixings for the precast concrete and construction industries

The Uniclip 'Void Clip'

*Compliant with BSEN 13964:2004 +A1:2006 Annex ZA.1.3
For use as a sub structural component in a suspended ceiling structure*

For the fixing of ceiling battens to concrete beam and block flooring systems whilst generating a clearance void for services

Standard Nominal Dimensions

Dim A designed to suit either 150, 175 or 225 sized precast beams or blocks

Dim B void depth standard sizes at 55,75,100,125,150 & 200mm
(Alternate bespoke sizes available on request, additional charges apply)

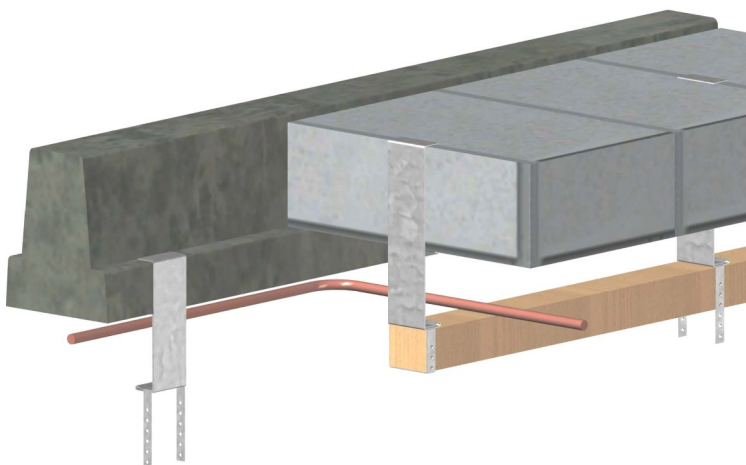

Manufactured from
1.0 & 0.8mm galvanised mild steel to BS EN 10326:2004

As with all 'fix-after' clips, fixing is advised prior to grouting the floor. However, in practice, when used with beam and block floors it is often possible to fix after grouting.

Typical usage - 4-5 clips per metre².

For the fixing of ceiling battens to create a controlled void for services to run under precast beam and block flooring systems.

Allows fixing after the blocks have been laid.

Established for over 40 years, Gordon Products is a manufacturer and supplier of quality products to a diverse range of manufacturing and construction industries.
